

5 REASONS TO CHOOSE

Our GalvinCare® Safe-Connect Shower System

1 Save Labour & Maintenance

The GalvinCare® Safe-Connect Shower System replaces four fixtures: shower head, shower diverter, hand held shower including wall connector and adaptor and shower mixer. This means reduced cost for labour and maintenance.

2 Easy Retrofit

Using the Safe-Connect Shower System means the installer can simply replace the existing shower head. No extra water lines, cutting walls or re-tilling is needed.

3 Perfect for Assisted Showering

The AS/NZS 3662 approved GalvinCare® Mental Health Anti-Ligature Safe-Connect Shower System makes assisted showering easy when required. When no longer in use, care givers can easily disconnect the hand held shower and remove it from the room to prevent self-harm.

4 Creating a Safe Environment

Designed to minimise risk and offer a safe environment for carers and patients, the GalvinCare® Safe-Connect Shower System provides anti-ligature and anti-vandal features.

5 Creating Home-Like Environments

Studies have shown that home-like environments in behavioural patient rooms help with the healing outcomes. The chrome plated design of the GalvinCare® Safe-Connect Shower System mimics a residential shower head helping to create a familiar and comfortable environment for the patient to feel at home.
