

# GalvinAssist® Contour 21 Basins

Purpose built for hospital, health care and aged care environments, the GalvinAssist® Contour 21 basin range delivers exceptional durability and advanced hygiene performance for long-term infection control.

Available in 500mm or 600mm sizes with standard or rear waste options, they are designed to meet the rigorous demands of clinical settings delivering reliability, ease of maintenance, and peace of mind.

## Anti-splash design

A fin-like structure positioned beneath the tap redirects water flow, reduce splashing by up to 90%\*. By controlling the direction and impact of water, this clever design helps prevent droplets from reaching surrounding surfaces. This significantly limits the spread of bacteria and viruses, reducing the risk of cross-contamination.

\*Nobody looks deeper into infection control. Brochure by Armitage Shanks: 0\_ASH\_Multisuite\_Multiproduct\_Bro\_GB\_Markwik21Plus;Contour21Plus.pdf

## Hygienic surface

The advanced hydrophilic glaze with ionic silver repels water, resists bacterial adhesion, and reduces biofilm build-up. This minimises cross-contamination risks and makes cleaning effortless.
