

Gentle on Little Hands. Strong on Safety.

Designed specifically to prevent young children from independently adjusting water flow at baths and basins, our Child Safety Wall Top Assembly Set adds a simple but effective layer of protection where it matters most.

Once set by an adult, the half-turn mechanism limits further operation, reducing the risk of accidental scalding or flooding in homes, schools, and childcare environments.

Trusted materials

Built from lead free DZR brass, these child safety taps are designed to support healthier water delivery.

Certified to AS 3718 and compliant with NCC 2022 Lead Free Requirements, it provides long-term confidence in every

No locks or complexity

The integrated ½ turn ceramic disc system sits seamlessly within the existing tap body, removing the need for extra locks, keys, or hardware, and offering a simple solution for both new and retrofit installations.

Thoughtfully engineered with safety built in, it gives adults smooth control while helping reduce unintended use by children, without compromising everyday ease of use.
