

GalvinAssist® Single Lever Mixers

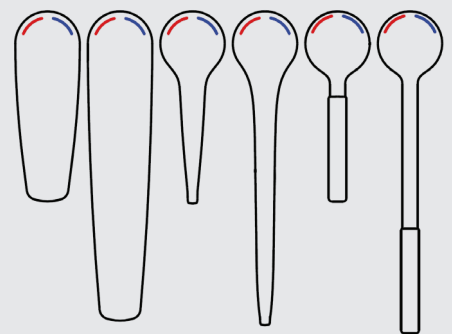

Embracing diversity

With a dedication to style and enhanced functionality, the GalvinAssist® range of single lever mixers blend form and function. Crafted with attention to detail, this range embodies both contemporary aesthetics and ergonomic design, catering to users seeking independence through various stages of care.

Specially designed for aged care, healthcare and education environments, these mixers stand out with their vivid colour markers, variety of stylish handles, and lustrous chrome or sleek brushed carbon finish. They focus on comfort and easy access, helping users feel at ease.

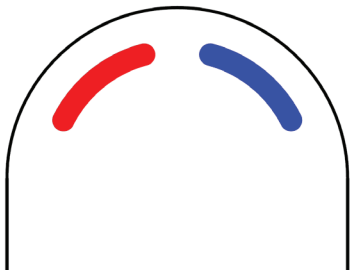

Handles

Diverse handles for diverse needs

Embracing accessibility and inclusivity, our tapware designs feature varied handle types—pin, flared and paddle—in short and long lengths.

Large temperature indicators enhance safety, ensuring a perfect fit for every user's needs. Indicators available in hot/cold and warm/cold.

Colours to complement your space

With a colour range designed to seamlessly fit into any space, you can choose from a vibrant palette to find the perfect handle that not only meets functional needs but also accentuates your space with contemporary flair.
