

Red Emperor® Meter Box Range

Manufactured from grey cast iron to AS 1830, Red Emperor® meter boxes are engineered to withstand harsh weather, ground movement and everyday wear. Their robust construction protects critical water, sewer, gas, fire and storm water infrastructure, reducing maintenance costs and extending service life.

Secure Access and Reliable Protection

Available in hinged and loose lid configurations, with secure locking options, Red Emperor® meter boxes help safeguard meters from tampering, vandalism and accidental impact. WA Water Corporation approved, they give asset owners and utilities confidence while keeping meters accessible for maintenance and readings.

Easy Installation Across Every Service

Red Emperor® meter boxes simplify installation with lightweight construction, generous internal space and easy pipework access. Colour-coded lid options make service identification simple at a glance, across water, sewer, gas, fire and storm water applications.

Whether you're installing a single meter or specifying for a large-scale development, Galvin offers a meter box to meet your project's requirements while saving time on site.

Wide range of sizes available.
