| 102.22.21.00 | CLINILEVER CP-BS LEAD SAFE HOSPITAL WALL BIB TAP TYPE 54 FIXED 150 C/D |
| 102.22.11.00 | CLINILEVER CP-BS LEAD SAFE HOSPITAL WALL BIB TAP TYPE 54 FIXED 150 J/V |

SPECIFICATIONS

- The CliniLever® product range is primarily used for hand washing applications in medical facilities, hospitals, aged care facilities, schools, and in-home care.
- CliniLever® products provide state of the art features to comply with the latest healthcare guidelines.
- The single lever for on/off, hot/cold temperature has a straightforward operation which simplifies hand washing.
- All CliniLever® products provide laminar flow (not aerated).
- Our highly sought after lever handle design can easily be operated with wrist or elbows.
- The main body is made of solid dezincification resistant (DR) brass rod, with a DR brass fixed outlet.
- Quick action subassembly includes brass ceramic cartridge component/jumper valve, with red and blue indicator button on 150mm lever action handles.
- Lead Safe[™] brass construction*

IMPORTANT: All CliniLever® healthcare taps are tested in accordance with AS/NZS 3718 and leave our premises in good working order.

*As 'lead free' is not currently defined by law in Australia and New Zealand, we have based our definition of Lead Safe™ on the requirements of Sec. 1417 of the USA's Safe Drinking Water Act (SDWA) and the relevant US standards NSF61 / NSF372. The SDWA defines 'lead free' as "not more than a weighted average of 0.25% lead when used with respect to the wetted surface of pipes, pipe fittings, plumbing fittings and fixtures".

WARNINGS: Special attentions to be paid on notes, photos, images, or drawings of assembly steps marked with the warning symbol.

| TECHNICAL DATA | | | | | |
|--------------------------------|-----------------|-----|--|--|--|
| Inlet | ½" BSP – Female | | | | |
| Outlet | Laminar Flow | | | | |
| Headwork | | | | | |
| Waling Days (IDs) | Min | 50 | | | |
| Working Pressure Range (kPa) | Max | 500 | | | |
| Morking Temporature Dance (9C) | Min | 5 | | | |
| Working Temperature Range (°C) | Max | 65 | | | |
| Nominal Flow Rate (LPM) | 5.25 | | | | |
| Construction | Brass | | | | |
| Finish | Chrome | | | | |
| | | | | | |

NOTE: Galvin Engineering continually strive to improve their products. Specifications may change without notice.

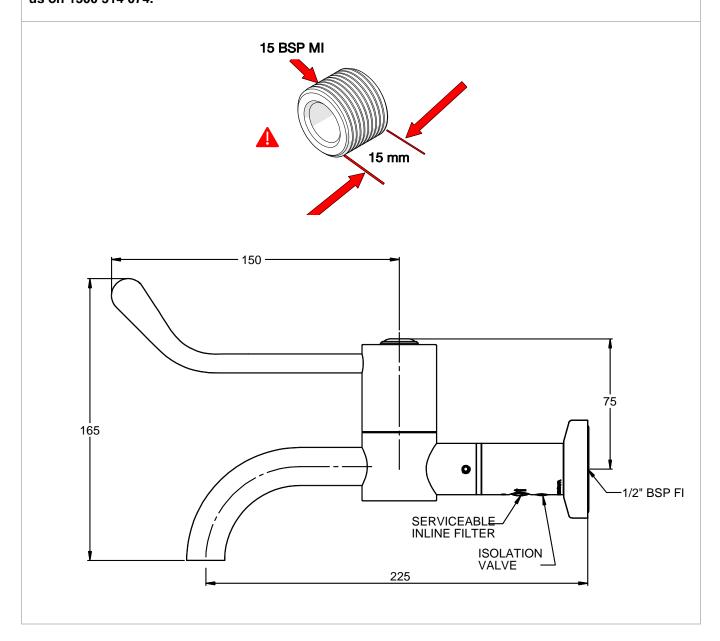

TOOLS REQUIRED

- Power drill, spanner, hex key
- Thread tape

DIMENSIONS-MOUNTING DETAILS

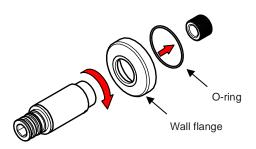

Wall Spud

- Wall spuds must be 15BSP MI and protrude from the finished wall by no more than 15mm Note: In some situations, a male thread connection on the tap may be more suited. If so, please contact us on 1300 514 074.

INSTALLATION

INSTALLATION COMPLIANCE: Galvin Engineering products must be installed in accordance with these installation instructions and in accordance with AS/NZS 3500, the PCA and your local regulatory requirements. Water and/or electrical supply conditions must also comply to the applicable national and/or state standards. Failing to comply with these provisions shall void the product warranty and may affect the performance of the product.

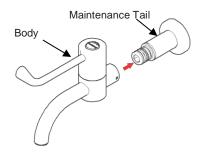

1. Fit wall flange

- Remove the maintenance tail from the body and take the wall flange out of the packaging.
- Ensure O-rings are secure in the rear of the wall flange and slide over the maintenance tail.

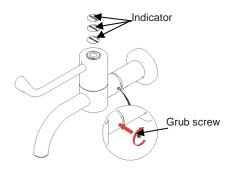

2. Fit maintenance tail

 Fit the maintenance tail with wall flange to the wall spud and fasten with the supplied 12mm Allen key. We recommend using thread tape or equivalent to ensure the connection does not leak.

3. Fit body

- Check maintenance tail to ensure O-rings are fitted correctly and in good condition to prevent leakage.
- Fit the body onto the maintenance tails until it sits flush against them taking care not to damage the O-rings.

4. Fit grub screws, indicator & testing

Ensure the CliniLever® body is pushed firmly against the maintenance tail and then secure in place with the supplied grub screws. ENSURE

ALL TWO (2) GRUB SCREWS ARE FITTED WITH SUPPLIED ALLEN KEY. If Grub Screws are missing, contact us on 1300 514 074.

- Once grub screws are secure, fit the water temperature indicator.
- Cold indicator must be blue, hot must be red and warm must be yellow.
- Open the regulating valve prior to turn the tap on. Open the lever handle, inspect the tap and check for any leaks.

| TROUBLESHOOTING | | | | | |
|---|--|---|--|--|--|
| PROBLEM | CAUSE | RECTIFICATION | | | |
| Tana ara dripping water | Ceramic discs/Jumper valves are worn or damaged. | Remove and inspect SBA. Remove debris and/or replace SBA if damaged. | | | |
| Taps are dripping water. | Tap seat is damaged. | Refurbish tap seat using a reseating tool. | | | |
| | Water is turned off. | Turn water on. | | | |
| Water is not flowing from tap. | flow regulator is blocked by debris. | Remove flow regulator from tap and remove debris. Install an inline strainer. | | | |
| Handle is loose. | Screw has come loose. | Tighten handle screw. | | | |
| Flange does not screw down onto basin/sink surface. | Tap bodies are set too far out. | Re-position tap bodies and breach piece. | | | |
| Spindle is difficult to turn (for jumper valve type) | Build up of scale on spindle, spindle worn or O-ring has been damaged. | Remove jumper valve, clean and regrease. Replace O-ring. Complete subasembly may need to be replaced. | | | |

| SERVICE AND MAINTENANCE | | | | | | | |
