DIMENSIONS

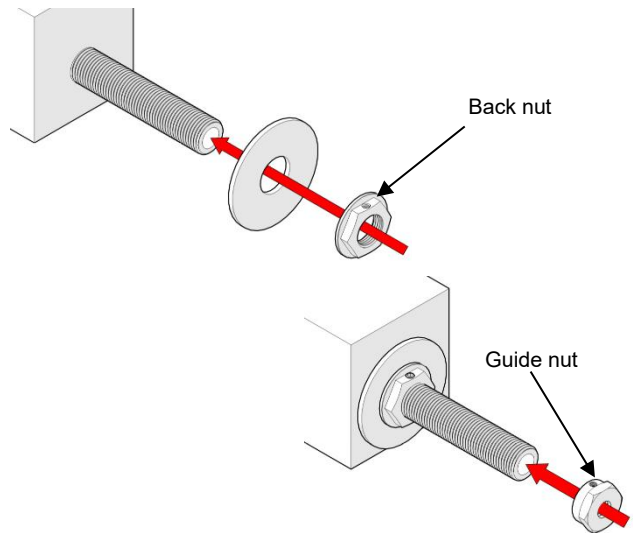

INSTALLATION

INSTALLATION COMPLIANCE: Galvin Engineering products must be installed in accordance with these installation instructions and in accordance with AS/NZS 3500, the PCA and your local regulatory requirements. Water and/or electrical supply conditions must also comply to the applicable national and/or state standards. Failing to comply with these provisions shall void the product warranty and may affect the performance of the product.

1. Insert Main Body

- Insert main body through wall and mark for cutting if too long. Remove any burrs.
- Consider anti-rotation pin position when inserting.

2. Secure Body

- Secure body using the large galvanized washer and flanged backnut
- Fit guide nut at the end and tighten lightly

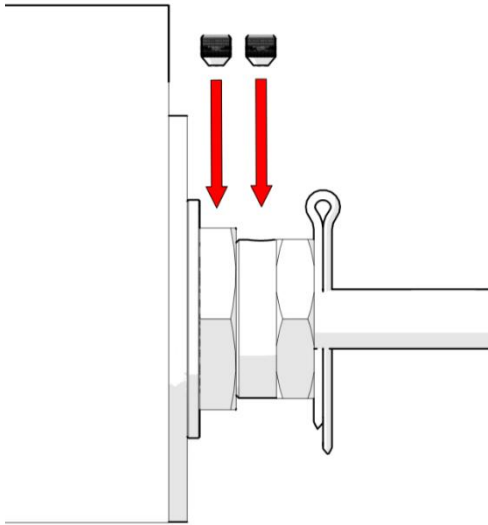

3. Fit Push Rod & Button

- Fit push rod & button through the main body

4. Fit cotter pin

- Drill through the extended rod with a Ø3.5mm drill
- Fit the cotter pin through the drilled hole and bend over the ends to stop it from falling out during use

5. Fit Grub Screws

- Fit the supplied grub screws into the guide nut and the flanged back nut and lock securely.

6. Checking and Testing

- Check to ensure the Push Button assembly functions.

WARRANTY

Galvin Engineering products are covered under our Manufacturer's Warranty. Galvin Engineering products must be installed in accordance with the installation instructions and in accordance with AS 3500 and NCC Volume Three, relevant Australian Standards and local authorities applicable to product being installed. Water and electrical supply conditions must also comply to the applicable national and/or state standards, failing to comply with these provisions may void the product warranty and affect performance of the product.
